

1. Job Title: District Construction Lead

Qualification: BE/B-Tech/M-Tech/MBA (Preferred)

Experience: 15-20 Years

Location: Initially for **Maharashtra** but feasibility open for across India to relocate.

Role Description:

- Lead and drive the Project with the perspective of ensuring the timely roll out of the sites across all the circles as per the business plan and Customer requirements so as to scale up deployment initiatives.
- End-to-end ownership of the project (Fiber) with regards to the timelines, quality, cost and processes.
- The position would directly work with and support the respective business heads (fiber), to effectively and timely execute, monitor and review the site deployment initiatives being undertaken, through functional and circle teams with key focus on Cost/Quality/Timelines/Customer Delight.
- Relationship Management - Internal (department heads) & External Stakeholders by way of strong and robust review mechanisms and timely update / information sharing so that all the concerned parties are informed of the project rollout update.
- Responsible for profitable and smooth running of all operations of the circle and ensuring all the required permissions, material, manpower and support is available.
- Accountable for the rollout of infrastructure through effective leadership and building a productive team down the line.
- Review the performance of Projects, Operations and other reporting functions on a regular basis.
- Expertise in translating Business Strategies into KRA and KPI which can further break down to Action Plans for achieving required Results.
- Resolve the escalated issues and be informed or consulted for any major change in Project Schedule

Skills Required:

- Project Management + Team Management
- Vendor / People Management
- Effective leadership and building a productive team down the line.
- Resolving Conflicts
- Strong Interpersonal & Team Building Skills
- High task orientation and must have ability to achieve challenging tasks / objectives.
